

MINING CABLE SUPPORT

CABLE BUNS

Lightweight, easy handling, highly visible cable buns are proving to be the preferred choice in high voltage power cable suspension.

FEATURES:

- Controlled radius helps prevent high voltage power cable damage and breakage
- Carbide friction strip embedded into the inner radius of the body eliminates cable slip
- Specially designed sling used in a 'choker hold' position clinches the power cable and hold it in place
- Constructed from a hard wearing polyurethane, therefore impervious to harsh weather conditions
- Cable buns are supplied with colour coded pennants sewn into the sling for easy identification
